

PORTABLE CRUSHING & SCREENING UNITS

Semi-trailer mounted crushing plants are also available from MEKA product range. They are complete with feeder, crusher, discharge conveyor and electrical control panel to make it user friendly and productive.

MEKA MMG plant combines jaw crusher with a high stroke, vibrating grizzly feeder resulting in high production mobile crushing machine. Grizzly feeder is with adjustable opening and by-pass chute for greater flexibility. The tail of the product conveyor raises for transport and lowers for operation, maximizing clearance under the jaw crusher. The conveyor discharge height adjusts to reduce material impact on the receiving conveyor.

MEKA MMPI series impact crushing plant is built with the MEKA MPI impact crushers, being the primary option in all limestone or recycling crushing applications. MPI large horizontal shaft impact crushers are matched with vibrating grizzly feeders providing high capacity primary impact crusher plants that are tough to match in productivity. The plant can be fed by wheel loader, excavator or dump truck. Optionally the impact crusher can be equipped with a tertiary breaker plate providing higher reduction ratio.

Compact, solid and easy set up

	Feeder Model	Crusher Model	Belt Conveyor Dimens.		Transport Dimensions		Weight	
			mm	inchxfoot	mm	feet	kg	lbs
